Office Action Summary

Art Unit: 3753

This action is responsive to the communication filed November 4, 2002.

The Office Action of June 10, 2002 is withdrawn in favor of the following. The amendment of November 4, 2002 has been entered. Claims 2-12 have been cancelled.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. §102(b) as being anticipated by Kumada. Kumada shows a gas stick with identical 2-type on-off valves 42-1 through 42-5 and MFC 43 mounted on a base 41. The ports of valves 42-1 and 42-4 are in a plane along the line, and are on either side of MFC 43, and have coplanar bases. Base 41 is read as two "mounts" integrally joined together in that the valves are mounted thereon, and the flow passages 46 together with the tubes 45-1 to 45-4 are read as joint members in that they provide fluid communication between the valve ports.
